CURRICULUM VITAE

Adam Scholey

Software Developer

07511 027403 · adamscholey25@gmail.com · LinkedIn · GitHub · Bradford, West Yorkshire

Personal Statement

A backend-focused Software Developer with hands-on experience building secure, production-oriented systems, primarily using Python and PostgreSQL. I specialise in building multi-tenant architectures with a strong emphasis on data security, including an enterprise search engine with row-level security and GDPR-compliant cross-border data access, and a live client platform built on FastAPI with Stripe payments and secure authentication. I hold a Distinction in Cyber Security and bring that security mindset into every system I build, from access control to data isolation. I am seeking a backend or full-stack software engineering role where I can apply this foundation to real-world products in a professional environment.

Experience

Software Developer (Part-time)

diam Systems Ltd · Oct 2025 - Present

- Built a multi-tenant enterprise search engine using Python and PostgreSQL, with GDPR-compliant cross-border data access.
- Implemented advanced PostgreSQL architecture with tsvector full-text search, row-level security, and table partitioning.
- Developed an internal project management tool in active daily use across the team, with real-time SSE updates and CLI integration.
- Built a production-ready restaurant booking system using Python and Flask, with Stripe payments and a visual floor plan.
- Building a paid client platform (framed@) on FastAPI with async SQLAlchemy, PostgreSQL, Stripe checkout, and passwordless authentication.
- Contributed to diamsystems.co.uk, the company website with e-commerce (Printify + Stripe) and i18n support.

Production Operator (Part-time)

Pure Pet Food Ltd · Oct 2024 - Present

- Operated production machinery in a fast-paced manufacturing environment.
- Maintained quality standards and met daily output targets.

Prototype Tester

Microsoft, Cambridge · 2019

- Selected by Microsoft to test an accessibility-focused mobile application prototype as a partially sighted user.
- Provided structured feedback on screen reader compatibility, contrast, and UX for visually impaired users.

Farm Hand

Brians Best Wools · Sept 2023 - Aug 2024

- Managed daily production tasks to strict schedules in a physically demanding environment, demonstrating reliability and consistency.

Skills

Professional Skills

- **Communication:** Communicated directly with the framed@ client to gather requirements and share project updates; able to explain technical concepts clearly to non-technical stakeholders.
- **Teamwork & Collaboration:** Collaborated with a team at diam Systems Ltd across multiple products - enterprise search, internal tooling and booking systems - contributing alongside other developers in a professional environment.
- **Self-Motivation & Initiative:** Independently designed and built multiple full-stack production systems from scratch, managing architecture, security, and deployment decisions without supervision.
- **Problem-Solving:** Consistently tackled complex technical challenges across projects, including multi-region data sovereignty, real-time collaboration, and multi-agent AI coordination.
- **Adaptability:** Quickly picked up new languages, frameworks, and tools across varied roles and projects, from production manufacturing to software development and accessibility testing.
- **Attention to Detail:** Maintained rigorous quality standards and test coverage across production systems, including a zero-knowledge cloud storage platform, ensuring reliability and correctness in both manufacturing and software roles.

Technical Skills

BACKEND

- → FastAPI - async endpoints, Pydantic, webhooks
- → ASP.NET Core - REST APIs, middleware, auth pipelines
- → Flask - async routes, blueprints, SQLAlchemy
- → SignalR - real-time hubs and SSE
- → OAuth 2.0 / GitHub OAuth with Authlib
- → Rate limiting, JWT, BCrypt, RBAC

DATABASES

- → PostgreSQL - RLS, migrations, query optimisation
- → SQLite - lightweight production DBs
- → EF Core - code-first schema, relationships
- → SQLAlchemy - ORM patterns and raw queries
- → Redis - caching, pub/sub, distributed locks

SECURITY

- → SAST / DAST / SCA - Semgrep, Snyk, GitLeaks, pip-audit
- → OWASP ZAP - authenticated security testing
- → AES-256 encryption, key rotation design
- → Zero-knowledge encryption patterns
- → GDPR compliance, CSP, input validation

TESTING

- → xUnit - unit and integration tests
- → pytest - fixtures, parametrize, coverage
- → k6 - load testing and performance baselines
- → Playwright - E2E browser automation
- → 370+ tests across production systems - unit, integration and E2E

DESKTOP & MOBILE

- → WinUI 3 - modern Windows applications
- → .NET MAUI - cross-platform desktop/mobile
- → Blazor - component-based web UIs
- → CommunityToolkit.Mvvm - MVVM patterns
- → PWAs - progressive web apps

INFRASTRUCTURE

- → Docker - containerisation and Compose
- → AWS S3 - object storage and signed URLs
- → Git, GitHub Actions, CI/CD pipelines
- → Cloudflare and Cloudflare Tunnel
- → Kubernetes - Deployment, HPA, NetworkPolicy

Projects

Enterprise Search Platform

Python, Flask, PostgreSQL, Redis, Kubernetes

- Multi-tenant SaaS platform with multi-region deployment across UK and EU.
- Advanced PostgreSQL architecture: tsvector full-text search, pg_trgm GIN indexes, row-level security, table partitioning by region, and PgBouncer connection pooling.
- GDPR-compliant cross-border data access with consent management, audit logging, and data sovereignty enforcement across UK and EU regions.
- Kubernetes deployment with horizontal pod autoscaling, multi-connector parallel search via asyncio, and guided database connection wizard with SSH tunnel.

Internal Project Management Tool

Python, Flask, SQLite

- Elegant project management tool with seven-stage lifecycle tracking.
- Real-time updates via Server-Sent Events (SSE) and email notifications.
- CLI package for command-line project management with REST API integration.
- Deployed to Fly.io with SQLite database and SMTP email notifications.

Restaurant Booking System

Python, Flask, MySQL, Stripe

- Production-ready booking system with visual SVG floor plan and time slider.
- Stripe Checkout integration for secure £10/head deposits with PCI compliance.
- Admin dashboard with Chart.js analytics, staff PWA with offline support.
- Email notifications, role-based access control, and comprehensive security.

framed@ · Client Booking & Events Platform

FastAPI, PostgreSQL, Stripe

- Paid client engagement building a music and events platform for framed@ Limited - scoped features, estimated effort, demoed progress and delivered against agreed milestones.
- FastAPI backend with async SQLAlchemy, PostgreSQL, and Pydantic; Stripe hosted checkout and webhooks.
- Passwordless magic-link authentication and real-time admin dashboard via SSE.
- 158 automated tests across unit, route-level and security-regression suites; live preview deployed ahead of production launch.

Zero-Knowledge Cloud Storage Platform

C#, Blazor, ASP.NET Core, PostgreSQL, AWS S3, SignalR

- Client-side AES-256 encryption before upload, so the server stores ciphertext only and never sees plaintext.
- Real-time collaborative editing via SignalR with Monaco editor and operational-transform conflict handling.
- AWS S3 object storage integration with signed URL handling for uploads and downloads.

Education

Bradford College

Sept 2023 - Jun 2026

- Level 1/2 Information and Creative Technology - DM
- English Language (6), Mathematics (4)
- BTEC Level 3 National Extended Diploma in Information Technology - D*D*D
- **Award:** Learner of the Year, Computing, Science & Environmental Technology, University of Bradford.

Trinity Academy Bradford

Sept 2018 - June 2023

- English Literature (5)
- BTEC Level 1/2 in Sport (Distinction)
- BTEC Level 1/2 in Engineering (Merit)
- BTEC Level 1/2 in Creative Imedia (Merit)
