Bradford, West Yorkshire

Personal Statement

Backend-focused software developer with commercial experience at diam Systems Ltd, building Python services with FastAPI, Flask, PostgreSQL and SQLAlchemy - APIs, database architecture, authentication, automated testing and tenant data isolation. I also build with C#/.NET (ASP.NET Core, Blazor, desktop apps) through software projects, and hold a Distinction in Cyber Security. Looking for a junior software development role where I can contribute to real engineering work and keep developing professionally.

Experience

Software Developer (Part-time)

diam Systems Ltd · Oct 2025 - Present

- Part of a small engineering team building internal tools and client products in Python - FastAPI, Flask, PostgreSQL and Redis.
- Backend work across three systems: an enterprise search platform (full-text search, row-level security, regional partitioning), an internal project-management tool used daily by the team (SSE updates, CLI client), and a restaurant booking system (Flask, Stripe deposits).
- Delivered a paid client platform (framed@) end to end - scoped requirements with the client, estimated work, demoed progress and shipped a FastAPI/PostgreSQL backend with Stripe checkout and passwordless authentication.
- Wrote automated tests and security checks as part of normal delivery - pytest suites plus Semgrep and OWASP ZAP scanning in CI.
- Contributed to diamsystems.co.uk, the company website, including e-commerce (Printify + Stripe) and i18n support.

Production Operator (Part-time)

Pure Pet Food Ltd · Oct 2024 - Present

- Operated production machinery in a fast-paced manufacturing environment.
- Maintained quality standards and met daily output targets.

Prototype Tester

Microsoft, Cambridge · 2019

- Selected by Microsoft to test an accessibility-focused mobile application prototype as a partially sighted user.
- Provided structured feedback on screen reader compatibility, contrast, and UX for visually impaired users.

Farm Hand

Brians Best Wools · Sept 2023 - Aug 2024

- Managed daily production tasks to strict schedules in a physically demanding environment, demonstrating reliability and consistency.

Skills

Technical Skills

LANGUAGES

- Python - primary, commercial use
- C# - projects and desktop apps
- SQL - PostgreSQL, MySQL, SQLite
- JavaScript - frontend and tooling

BACKEND & APIS

- FastAPI - async endpoints, Pydantic, webhooks
- Flask - blueprints, SQLAlchemy
- ASP.NET Core - REST APIs, middleware
- REST API design, SSE, rate limiting

DATABASES

- PostgreSQL - RLS, partitioning, full-text search
- SQLAlchemy - async ORM, migrations
- MySQL, SQLite
- Redis - caching, pub/sub, locks
- EF Core - code-first schema

SECURITY & AUTH

- OAuth 2.0 / GitHub OAuth, sessions, CSRF
- TOTP MFA, Argon2id / BCrypt hashing
- Client-side AES-256 encryption
- Semgrep, OWASP ZAP, pip-audit in CI

TESTING

- pytest - fixtures, parametrize, coverage
- xUnit - unit and integration tests
- Playwright - E2E browser automation
- k6 - load testing

INFRASTRUCTURE

- Git, GitHub Actions - CI/CD pipelines
- Docker - containerisation and Compose
- Fly.io, Cloudflare R2 / Tunnel
- AWS S3, Kubernetes (project-level)

C# / .NET & CROSS-PLATFORM

- Blazor, SignalR - real-time web apps
- WinUI 3, .NET MAUI - desktop and mobile
- CommunityToolkit.Mvvm - MVVM patterns

Projects

framed@ · Client Booking & Events Platform

FastAPI, PostgreSQL, Stripe · framedat.uk

- Paid client engagement for framed@ Limited - scoped features, estimated effort, demoed progress and delivered against agreed milestones.
- FastAPI backend with async SQLAlchemy, PostgreSQL and Pydantic; Stripe hosted checkout, signed webhooks and QR ticketing.
- 158 pytest tests across unit, route-level and security-regression suites. In development - preview deployed ahead of launch.

Enterprise Search Platform

Python, Flask, PostgreSQL, Redis

- Multi-tenant search service - tsvector full-text search, pg_trgm indexes, row-level security and regional partitioning enforced inside Postgres.
- Consent management and audit logging built into the query path, designed around GDPR requirements.
- Federated connectors query sources in parallel via asyncio + httpx; Redis for cache, sessions and distributed locks.

Internal Project Management Tool

Python, Flask, SQLite · diamtracker.fly.dev

- Seven-stage lifecycle tracking in daily use by the diam Systems team.
- Live updates via Server-Sent Events, email notifications, and a CLI client sharing the same REST API.
- Deployed to Fly.io with GitHub OAuth sign-in.

Encrypted Storage & Collaboration Platform

C#, ASP.NET Core, Blazor, PostgreSQL, SignalR · personal project

- Files encrypted client-side with AES-256 before upload - the server stores ciphertext only.
- Real-time collaborative editing via SignalR with Monaco editor; S3/R2-compatible object storage.

Education

Bradford College

Sept 2023 - Jun 2026

- Level 1/2 Information and Creative Technology - DM
- English Language (6), Mathematics (4)
- BTEC Level 3 National Extended Diploma in Information Technology - D*D*D
- **Award:** Learner of the Year, Computing, Science & Environmental Technology, University of Bradford.

Trinity Academy Bradford

Sept 2018 - June 2023

- English Literature (5)
- BTEC Level 1/2 in Sport (Distinction)
- BTEC Level 1/2 in Engineering (Merit)
- BTEC Level 1/2 in Creative Imedia (Merit)
